

Overview

- Technology
- Applications
- Business opportunity
- Market introduction

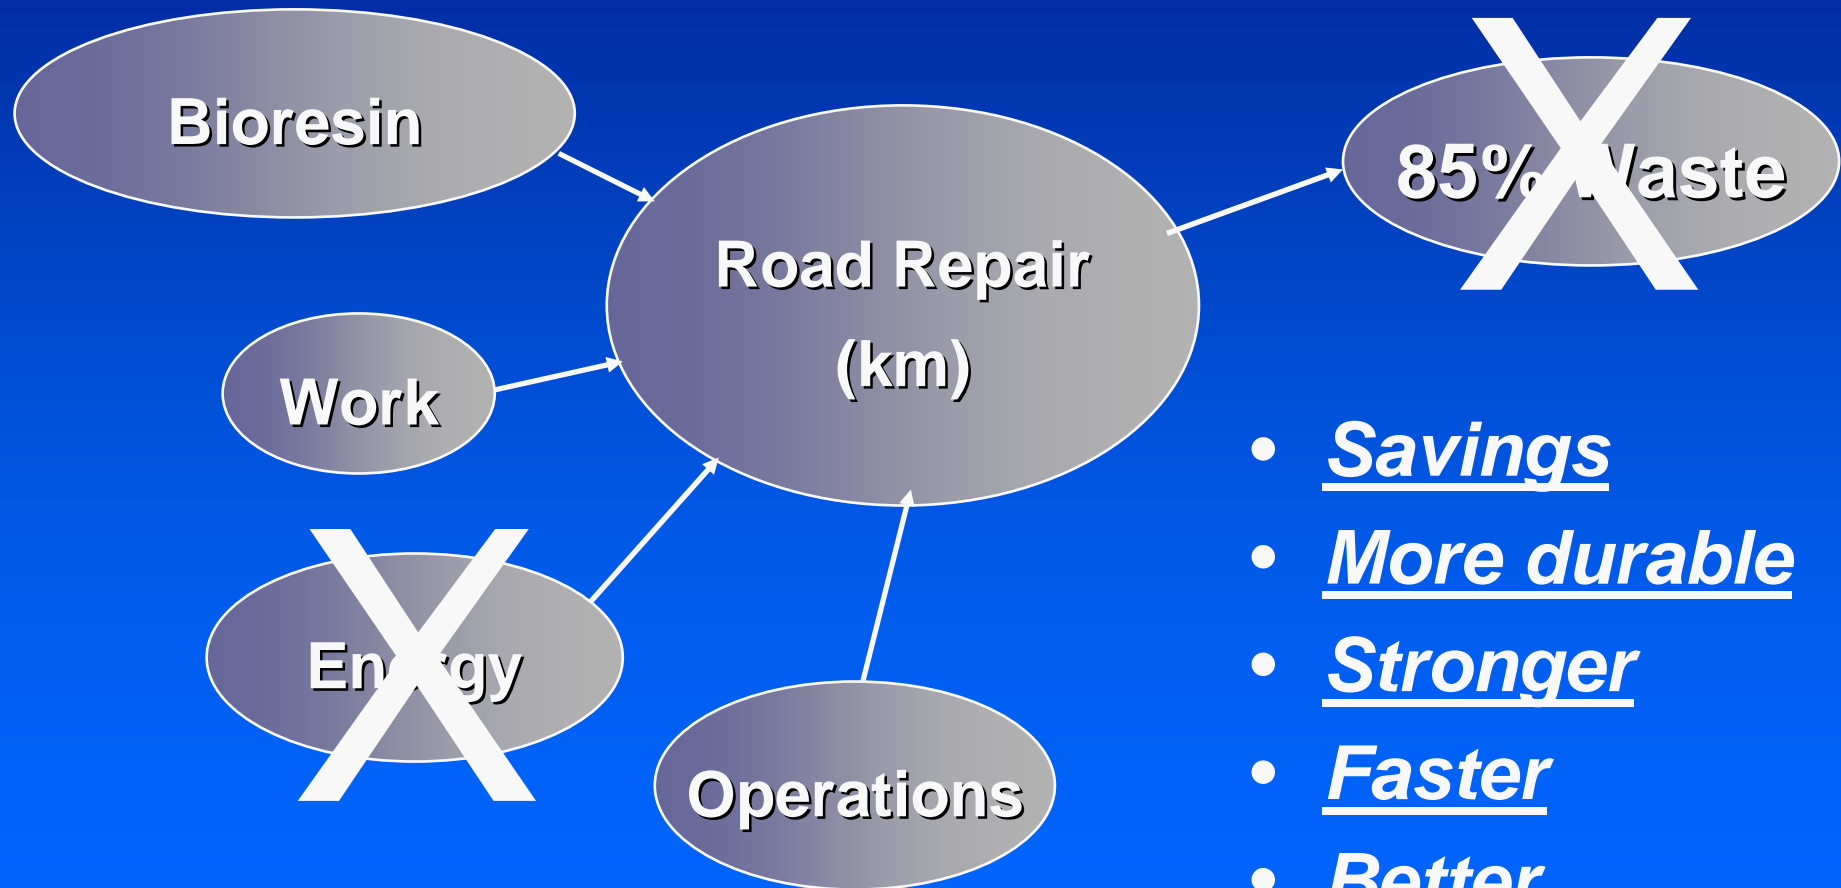

The Innovation

- Material & Process for road paving and recycling
- 100% recycling of asphalt or concrete possible
- Strong and durable road surface
- Cost effective and environmental process
- Recycling of whole road sections or repair of potholes

Road Repair - Today

Tomorrow

- Savings
- More durable
- Stronger
- Faster
- Better
- Environmental

Adding value

- Significant cost reduction
- Full recycling of material - no waste
- Durability - long life time
- Strong - stable at high temperatures (>80 Celcius)
- Water penetration tuneable
- Positive safety profile (OHS and environment)

Proof of Concept

- 147 km Road in Eastern Europe repaired with BIOVEST Recycling of whole roads
- No problems after 7 years in use
- News projects
